11 Waterproof Backpacks for Impermeable Gear Storage

Because the only thing worse than a wet sweatshirt is a soggy sandwich.

Outdoorspeople understand that snacks, a dry layer, and your electronics are essential for an epic day outside. When you're fishing, kayaking, paddle boarding, canoeing, boating, hiking, or doing anything with a moderate risk of getting wet, a basic backpack won't shelter your gear appropriately. You'll need a waterproof backpack to protect your essentials. So even if you're dripping like a wet dog, your gear will be safe in one of these dry bags.

Mountain Hardwear Scrambler 30 OutDry Backpack

\$130

BUY NOW

The Scrambler is more of a traditional backpack for day hiking, whether winter or summer, as opposed to the dry sacks in this roundup. So while it may not handle being fully submerged in water, it's a great hiking companion, even in thunderstorms, as it's a fully featured daypack that sports the company's Outdry waterproof technology.
