
Dry.Q™ Active/

Changing what's possible for aerobic athletes in extreme environments.

A new generation of lightweight fabrics—possible only because we can source every fabric component

Incredible fabric combinations—ultra light weights, stretch fabrics, soft and hard shells, body mapping and climate control

Totally waterproof. Totally flexible. Totally lightweight.

Dry.Q™ Active combines the revolutionary waterproof-breathable performance of Dry.Q with stretch fabrics, super-lightweight materials and body-mapped designs to create a new generation of mountain aerobic apparel.

A new generation of lightweight, breathable stretch fabrics for unprecedented freedom of movement

Taped seams and welding for complete waterproofness
