Pros: Good warmth-to-weight ratio, small packed size, nice hood design

Cons: Zipper snags

Bottom line: This is a solid winter bag with a wider cut than the Snowbunting and the Antelope.

Editors' Rating: ★★★★★

Manufacturer: Mountain Hardwear

Our Verdict

The **Mountain Hardwear Phantom Torch 3** is a well-constructed, lightweight bag for backpackers and climbers looking to shave weight without compromising comfort and features. The bag's nearly translucent shell material proved to be very resistant to snow melt and condensation, but not as weatherproof as [Feathered Friends Snowbunting](#) or the [Western Mountaineering Antelope](#). Our testers appreciated its unique features like the hood cinches and the awesome double stash pocket.
